RESEARCH IN PROGRESS

Book Project

Congressional Information and Policymaking in the Age of AI. Examines how Congress acquires, processes, and uses policy information as artificial intelligence changes the informational environment of legislative institutions.

Working Paper

“The Impact of Statewide Vote-by-Mail on Partisan and Minority Participation in Elections.” With Eric Helland. https://papers.ssrn.com/sol3/papers.cfm?abstract_id=4697323.

Ongoing Research Projects

Low-Propensity Voters and the 2020 Election. Analysis of how emergency changes to voting access affected participation among infrequent voters, and the implications for state policy.

Pilot Programs and Congressional Policymaking. Analysis of pilot programs in congressional legislation as a means for promoting evidence-based policymaking, conducted in collaboration with the Bipartisan Policy Center.

Artificial Intelligence, Information, and Governance. Developing an interdisciplinary research agenda examining how large language models (LLM) will reshape policy research, public-sector information processing, and institutional decision-making, building on ongoing work applying LLM research methods in social science.

GRANTS AND SPONSORED RESEARCH

William and Flora Hewlett Foundation. Policy Lab, Claremont McKenna College. \$750,000, 2019-25. Co-developed proposal and secured program funding with Eric Helland. Supported the Policy Lab program and faculty research, including sabbatical and research support for *Empowering the Purse: How Earmarks Help Congress Do Its Job* (Oxford University Press, forthcoming 2027).

William and Flora Hewlett Foundation. Dreier Roundtable, Montpelier Project, Claremont McKenna College. \$250,000, 2015-18. Undergraduate Research Supervision

Undergraduate Summer Research Fellows Program, Claremont McKenna College, 2020-present. Direct an annual 8-week summer fellowship program, supervising a team of undergraduates working on my academic research. Fellows receive structured training in data science, policy analysis, and applied political research, and contribute to advancing my research agenda.

- 2026: LLM identification and categorization of authorizing language for pilot programs in congressional legislation.
- 2025: Using High-Performance Computing (HPC) to assess changes to state-level voting access laws using nationwide voter administrative data, including training with the University of Southern California Center for Advanced Research Computing to use the Laguna HPC cluster.
- 2024: Content analysis of earmarking journalism using a retrieval-augmented generation (RAG) pipeline.
- 2023: Classifying earmarking journalism with dictionary methods.
- 2022: Evaluating county-level turnout and access to voting in the 2020 federal elections.
- 2021: Evaluating state election emergency laws and disrupted elections during COVID.
- 2020: Creating survey instruments and interviewing former Members of Congress regarding their career experience with earmarking.

Research Assistant Supervision, Claremont McKenna College, 2022–present.

Supervise teams of undergraduate research assistants during the academic year on scholarly research projects, meeting weekly to review progress and evaluate research tasks. Responsibilities include training students in data collection and cleaning in R, LLM-assisted natural language processing, data coding and classification, literature review, and preparation of research write-ups to professional policy and scholarly standards. RA teams have contributed to research on congressional earmarking, voting access, pilot programs in congressional legislation, and AI-assisted text-as-data analysis.
